Divelbiss Corporation spent 2020 performing equipment additions to our production facility. One of the new additions is our new Yamaha Surface Mount Technology (SMT) pick and place machine.

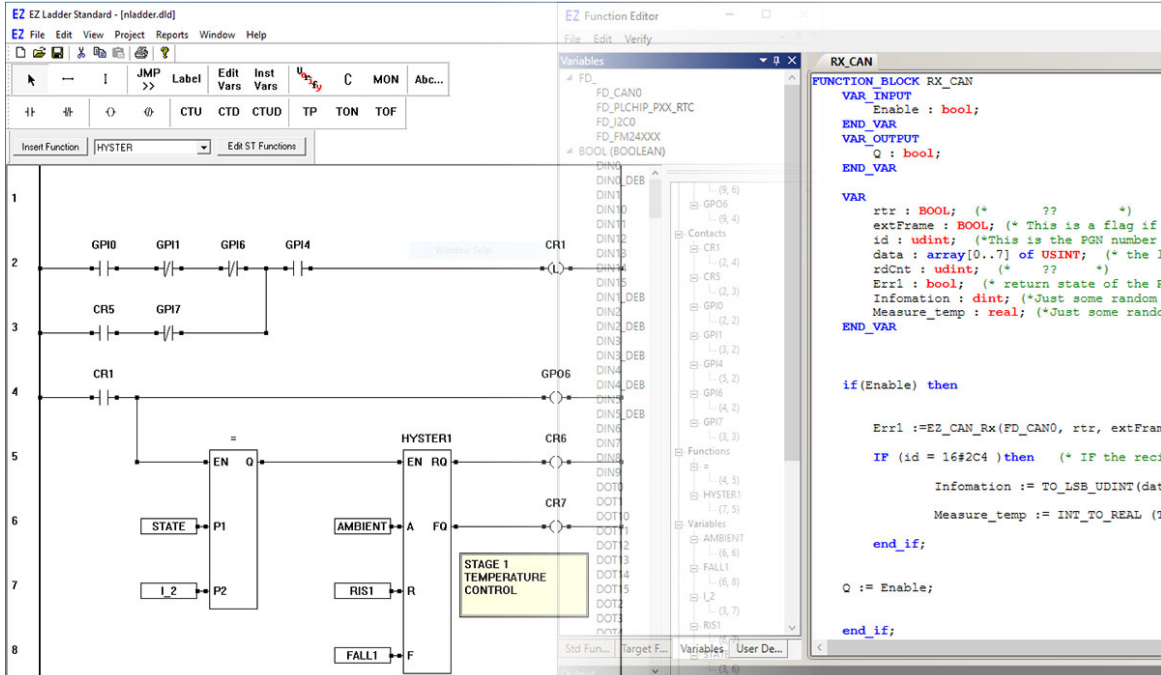

The new Yamaha machine assembles SMT components to printed circuit boards quickly and accurately; which allowed us to greatly improve efficiency.

With our manufacturing equipment additions, Divelbiss is competitive in Contract Manufacturing while still providing you a personal experience and relationship.

If it has been a while since we quoted production or if we have never quoted production for you before, reach out and see just how competitive our manufacturing can be.

EZ LADDER TOOLKIT

The latest version of EZ LADDER Toolkit, version 1.2.5.0 is now available for download. A new EZ LADDER manual is packaged as part of the installer and is separately downloadable.

Version 1.2.5.0 of EZ LADDER Toolkit is up to date with all the current functions and includes features like MQTT IoT communications, SNTP time linking, graphics LCD support, new time functions, new SPI devices and much more. The list of manual and feature changes can be found in Chapter 1 of the EZ LADDER Toolkit manual.

Recent website enhancements for EZ LADDER Toolkit include the ability to download versions without a password and the ability to request and receive an EZ LADDER serial number and CID code via email that is required for installation and activation automatically.
