

Divelbiss E-Newsletter - May 2021

May 20, 2021

Divelbiss is your Electronics Design and Manufacturing Partner

The first stage of any product life cycle is the **Product Concept** itself.

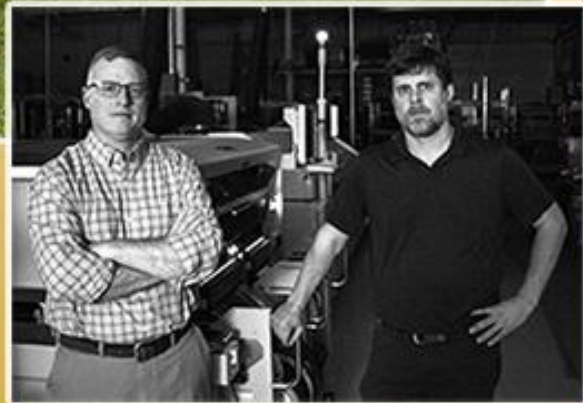

As part of this concept stage, there are many questions that should be answered, including:

- What is the market for this product?
- What product features does the market require?
- What is the end user's level of technical expertise?

Divelbiss Corporation teams with you during the concept stage.

- Collaboration with your team's stakeholders (sales, marketing, engineering, management) to understand product vision.
- Discussions of viability of various features
- Integration of current and best-fit technology with your product concept
- Cross-pollination of technology from other market areas
- Evaluation of long-term product life-cycle goals
- Establishing a long-term relationship to support your business goals

Electronics Design & Manufacturing Since 1974

Founded in 1974, Divelbiss Corporation, has provided electronics design and manufacturing solutions based on customer needs by focusing on using best-fit technologies for solutions, robust designs and quality manufacturing.

Family owned, the tradition and commitment to customer solutions, quality design and manufacturing continues today from generation to generation.
