# ELECTRONICS WITHOUT LIMITS

Engineering & Contract  
Manufacturing under one roof.

# YOUR ELECTRONICS PRODUCT DESIGN & MANUFACTURING PARTNER

Divelbiss designs and manufactures industrially hardened electronic control solutions for OEMs and technical teams across diverse industries. From off-the-shelf control products to fully custom builds, we support the full lifecycle from concept and specification through long-term production and support.

## WHY DIVELBISS?

**We solve problems, not just build to print.** Our engineering team helps customers improve designs, reduce risk, and avoid surprises before production.

**Family-owned and here for the long haul.** We're not venture-capital owned and we're not here to flip a business. We're building Divelbiss for the next generation.

**Support that doesn't disappear.** If we build it, we stand behind it, repairs, legacy support, and real people you can call when something needs attention.

**Built-in testing capabilities.** We can test to your requirements in-house, something many small shops simply can't offer.

**Scalable partner.** Some manufacturers are built around rigid minimums. Divelbiss is structured to support customers at different stages, from early product development to long-term production,

**You get what you pay for.** Overseas suppliers may cost less upfront, but customers face quality issues, lack of documentation, and support. Divelbiss stands out with quality, service, and long-term support.

## OUR PROCESS:

- 1 PRODUCT CONCEPT
- 2 SPECIFICATION DEVELOPMENT
- 3 PRODUCT DESIGN
- 4 PROTOTYPE & DESIGN VALIDATION
- 5 FIELD TESTING & CERTIFICATIONS
- 6 PRODUCTION RAMP-UP
- 7 VOLUME PRODUCTION
- 8 LONG-TERM SUPPORT

## QUALITY | TESTING | STANDARDS

9001 : 2015  
WITH DESIGN

50+ YEARS IN BUSINESS

MADE IN OHIO

# ENGINEERING AND DESIGN SERVICES

**Engineering that helps you get it right before production.**

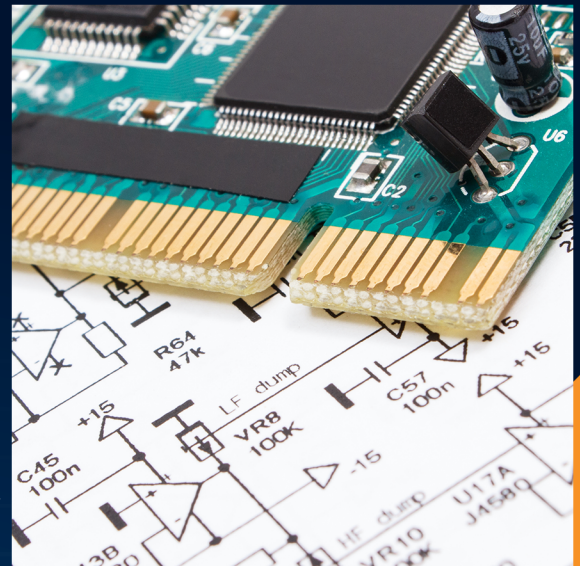

Divelbiss supports OEMs from concept through launch, bringing practical design guidance, manufacturability feedback, and long-term thinking to every build.

**Capabilities include:**

- PCB design
- Electronics design
- Mechanical/enclosure design
- Software development
- Agency testing support
- Cloud and app development

## DESIGNED FOR MANUFACTURABILITY

Our team concept brings engineering and manufacturing together early so what gets designed can be built efficiently, reliably, and with quality.

## EXPERIENCE ACROSS MULTIPLE INDUSTRIES:

**Oil & Gas**

**Agriculture & AgTech**

**Aerospace & Defense**

**HVAC & Environmental**

**Industrial & Energy**

**Custom OEM Applications**

**Transportation & Transit**

**IoT/Remote Monitoring**

## CONTRACT MANUFACTURING

**Contract manufacturing with real engineering support.**

Whether you need a small electronic sub-assembly or complete product assembly, Divelbiss delivers contract manufacturing built to your requirements, SMT, thru-hole, box builds, and control panels with testing available to meet your needs.

**Capabilities include:**

- Surface Mount (SMT) & Thru-Hole assembly
- Selective soldering
- Low to high volume PCB assembly
- Box builds and control panels
- RoHS and Non-RoHS assembly
- Conformal coating & encapsulation
- Supply chain resources
- 3D AOI & X-RAY

## TESTING TO YOUR REQUIREMENTS

Need your assembly tested or validated before production? We'll build a plan to meet your requirements and reduce risk before ramp-up.

# READY TO TALK?

Divelbiss brings engineering, manufacturing, testing, and support together under one roof.  
**From concept through production, we help OEMs build with confidence.**
