

YOUR ELECTRONICS MANUFACTURING PARTNER

What sets Divelbiss apart from other Electronics CMs? **Everything.**

From product design and PCB assembly to testing and long-term support, Divelbiss helps OEMs move from concept to production with confidence.

WHAT WE DO

Low to high volume
PCB assembly

Box builds and
control panels

Product &
Environmental Stress
Testing

Engineering
support

Product
Programming

What sets Divelbiss apart from other Electronics CMs? **Everything.**

WHY DIVELBISS

100% Domestic
Production

Scalable
Partner

We Solve Problems,
not just Build to Print

Family-owned
since 1974

A True & Trusted
Partner

State of the Art Equipment + Our Engineers
+ A Personalized Experience
= **Your Success**

J-STD-001

ISO 9001:2015 w/Design

IPC-A-610

Let's build the right solution.

MANUFACTURING CAPABILITIES

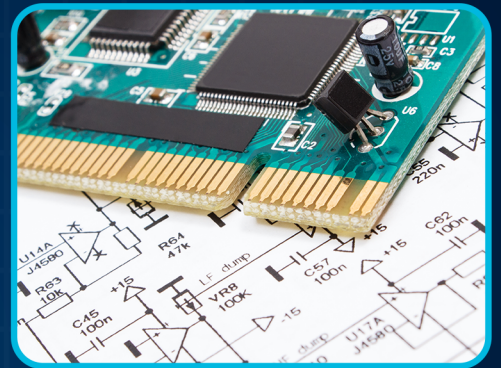

1. PRINT CIRCUIT BOARD ASSEMBLY

- SMT PCB assembly
- Thru-hole PCB assembly
- Prototype runs to low/high volume production
- 3D Automated Optical Inspection (3D AOI) & X-Ray
- Selective soldering
- Automated conformal coating
- RoHS / Non-RoHS

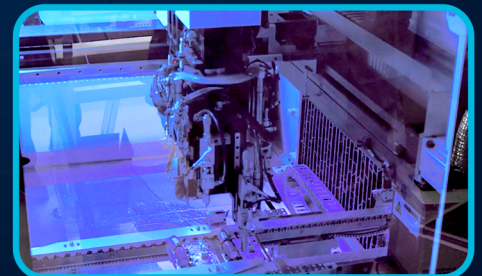

2. ELECTROMECHANICAL / PRODUCT ASSEMBLY

- Electronic sub-assemblies
- Complete product assembly
- Potting & encapsulation
- Cables & wiring harnesses
- Electrical panel assembly
- Box builds

3. TESTING, PROGRAMMING & FIXTURES

- PCB/product testing
- Functional testing
- PCB/product programming
- Custom fixturing
- BGA rework
